

## **Webster University's Audio Engineering Society**

### *Proudly presents the Fifth Annual Central Region Audio Student Summit!*

*Last year was a total success, with almost 500 participants  
and this year, with your help, we expect many more!*

**Friday, March 18<sup>th</sup> - Sunday, March 20<sup>th</sup>**

Past Summits have featured top names in the audio industry such as Phil Ramone, George Massenburg and Frank Filipetti, panel discussions and tutorials with the best in the business, exhibitors showing off cutting edge audio equipment, free music, free food, a mixing competition, and a Platinum Panel.

- Panels and tutorials on such topics as Internships and Entry Level Positions, the Future of Analog, Aesthetics, Studio Ownership, Did the Internet Kill the CD Star, Women in Audio, Sound Reinforcement, Signal Processing, Restoring Vintage Gear, and Late Night Analog to name a few.
- A mixing Competition with great prizes!
- Recommendations for cheap local lodgings!
- All included in your \$25 early-bird registration fee. We'll even throw in lunch on Saturday and breakfast both mornings!

This will be a great opportunity for students from the Central Region, some of whom cannot attend the conventions in New York or California, to mingle with their peers from other educational institutions as well as professionals.

***Come rub elbows with the stars and play with cool gear!***
