Educational Technology (MET)

Program Description
The master of educational technology (MET) degree enables corporate and military trainers, as well as other professional educators, to develop multiple literacies and to foster creative thinking using technologies. Candidates learn how to develop learner-centered and content-centered projects and assessments. Candidates in this program acquire the 21st century learning skills to creatively apply, assess and reflect on technologies and media in formal and informal learning environments. Candidates view technology and media as vehicles for learning, communication and collaboration.

Themes of the Master of Educational Technology Degree Program
Candidates who pursue the master of educational technology (MET) degree explore technology and multimedia including print, graphics, sound, video and the web. The degree is aligned to International Society for Technology in Education (ISTE) NETS-T standards:
- Practicing, supporting and fostering learning and creativity through technologies.
- Enhancing learning experiences and assessments with digital age tools and processes.
- Modeling authentic digital age work and learning practices through collaboration, professional development and leadership in professional learning communities.
- Practicing and modeling digital citizenship and responsibility with colleagues and with learners.
- Engaging in professional growth and leadership.
