

SUST - Sustainability Studies

Global Citizenship Program Knowledge Areas (....)	
ARTS	Arts Appreciation
GLBL	Global Understanding
PNW	Physical & Natural World
QL	Quantitative Literacy
ROC	Roots of Cultures
SSHB	Social Systems & Human Behavior

Global Citizenship Program Skill Areas (....)	
CRI	Critical Thinking
ETH	Ethical Reasoning
INTC	Intercultural Competence
OCOM	Oral Communication
WCOM	Written Communication
** Course fulfills two skill areas	

of social, political, environmental, communication, educational, economic, and ethical factors in the development of sustainability. May be repeated if content differs.

SUST 3200 Advanced Topics in Sustainability (1-4)

This course offers an advanced examination of topics in sustainability studies. Content will vary but will require in-depth study of the particular issues in sustainability and the role of social, political, environmental, communication, educational, economic, or ethical factors in creation of problems and possibilities for solutions. May be repeated if content differs.

SUST 4200 Seminar in Sustainability (1-4)

This seminar entails advanced study on a particular topic in sustainability. May be repeated if content differs.

SUST 4500 Sustainability in Action (3)

Serves as the keystone for the sustainability studies minor, providing students the opportunity to integrate and apply the skills and knowledge they have developed through the rest of the program. In addition to studying examples of successful sustainability initiatives both locally and globally, students will choose individual service-learning projects, either off- or on-campus, in which they analyze and address specific challenges to sustainability. Each project will include some elements of written and/or oral communication. **Prerequisite:** All other requirements for the sustainability studies minor or permission of the instructor.

SUST 1000 Introduction to Sustainability Studies (3)

Introduces students to the interdisciplinary field of sustainability studies, which focuses on the goal of transforming human societies so that we may equitably meet current human needs (such as health, energy, food, shelter, and transportation) while preserving the natural systems required to meet the needs of future generations. Includes 1) frequent writing assignments to allow students to express their understanding of the complex systems that provide the foundation for environmental and human health and well-being and 2) experiential elements (field trips and a campus sustainability project) that allow them to apply and test classroom theories and information. Guest speakers will represent different disciplines that contribute to sustainability studies. **GCP Coding: (PNW) (CRI).**

SUST 1100 Enhancing Campus Sustainability (3)

Students will learn principles of sustainability and then use their local campus of Webster University and the surrounding community as their laboratory to analyze opportunities to improve environmental practices relating to energy, water, air, and/or materials use. Working in teams, they will select specific areas of campus sustainability to research and analyze; each team will then develop a proposal making recommendations to improve sustainability in that area.

SUST 1200 Topics in Sustainability (1-4)

This course introduces students to important topics in the area of sustainability, such as environment, sustainable development, water systems, climate change, energy, pollution, waste, biodiversity. May be repeated if content differs.

SUST 2200 Issues in Sustainability (1-4)

This course offers insight into a variety of issues central to sustainability studies. Content will vary but will look at the role
