

Department of Mathematics and Computer Science Mission Statement

The mission of the Department of Mathematics and Computer Science is to equip our students with the critical thinking skills, communication abilities, and depth of knowledge necessary to become lifelong learners and productive members of our technologically oriented society.

School of Business and Technology

Our mission is to prepare lifelong learners for professional fulfillment in the fields of business and technology through the application of knowledge in a supportive academic environment.

Mission Statement for BSCS

The mission of the BS in Computer Science program is to guide students in their quest to acquire the technical knowledge and skills needed to design, build, and maintain the complex software applications necessary to solve problems in a variety of real-world settings.

Mission Statement for BSCS – Information Technology Program

The mission of the BS in Computer Science with an emphasis in Information Technology program is to guide students in their quest to acquire the technical knowledge and skills needed to design, build, and maintain the complex information systems necessary to solve problems in a variety of real-world settings.

Mission Statement for BSCS – Information Management Program

The mission of the BS in Computer Science with an emphasis in Information Management program is to guide students in their quest to acquire the technical and business knowledge and skills needed to design, build, and maintain the information management systems necessary to solve problems in a variety of real-world settings.

Mission Statement for MSCS – Distributed Systems

The mission of the MS in Computer Science with an emphasis in Distributed Systems program is to guide students in their quest to acquire the technical knowledge and skills needed to design, build, and maintain the complex, distributed software applications necessary to solve problems in a variety of real-world settings.

Mission Statement for the Web Services Certificate

The mission of the Web Services Certificate is to assist students in acquiring the knowledge and skills needed to understand, develop, analyze, and implement Web services within their company in order to incorporate Web services in their applications and networks.

Mission Statement for the Web Site Design Certificate

The mission of the Web Site Design Certificate is to assist students in achieving the skills needed to create and maintain web sites using a variety of applications programs in order to create web sites for business and individuals.

Mission Statement for the Web Site Development Certificate

The mission of the Web Site Development Certificate is to provide students with the coding skills needed to create and maintain web sites using a variety of programming tools in order to create and implement databases on company websites.

Mission Statement for BA/BS in Mathematics

The mission of the BA/BS in Mathematics program is to prepare lifelong learners for fulfillment in the field of mathematics by delivering knowledge in a supportive academic environment.

Mission Statement for the Graduate Certificate in Decision Support Systems

The mission of the Graduate Certificate in Decision Support Systems is to provide information technology professionals and business managers with the skills needed to develop and analyze decision support systems in large-scale data warehouses.
