

Mission Statements Management Programs

The Mission Statement of the Management Department

The Mission Statement of the Management Department is to provide innovative academic and competency-based training to prepare our students for the managerial roles of the future. These roles will place a premium on the ability to apply professional theory and practice to the resolution of complex managerial and organizational dilemmas in dynamic environments.

MA Human Resources Management

The Mission of the Masters in Human Resource Management Program is to provide advanced graduate training in HR theory and practice and to prepare our graduates for changes and challenges in roles and perspectives that the field continues to require.

MA Human Resources Development

Our Human Resources Development program prepares HRDV students for life long learning and successes in all organizations which value their most important resource, their people. We deliver real world knowledge and skills which emphasizes practical and effective programs for finding and developing human resources. Our program provides major benefits to our HRDV students and the organizations that employ them.

Master of Public Administration (MPA)

The mission of the Master of Public Administration (MPA) program is to educate those interested in leadership and management in the public, private and nonprofit sectors of society.

MA Management & Leadership

Master of Health Administration (MHA)

To assist health care professionals advance in the field by providing academic knowledge and understanding of health administration.

MA Procurement and Acquisitions Management

A Master's Degree in Procurement and Acquisitions Management offered by Webster University, through its School of Business & Technology and its Management Department, prepares students from within both government and industry to explain, apply and synthesize the important terminology, facts, concepts, principles, analytic techniques, and theories used in the field of procurement and acquisitions management in order to meet the issues, challenges, and opportunities confronting the Purchasing and Supply Management professional in the first quarter of the 21st century. This curriculum provides a foundation for students to identify and assess their organization's competitive/operational imperatives, to create value to their organizations products or services, and to promote creative thinking, problem solving, and team work within their organizations to enable them to successfully compete in the global marketplace.

MA Health Care Management

In coherence with the general Mission and Scope of Webster University, and its statements of Ethics, the mission of those two programs, health care management program and human resource development combines cultural and intellectual legacies with a pragmatic concern for meeting the challenges in the past, present and future of the healthcare system.

In doing so, Webster University's faculty of those programs

- creates an adult student-centered learning environment accessible to health care professionals with work experience in various health care organizations who are interested in preparing our students to broaden their competencies as leaders/managers in the field and to take various positions such as directors of organizations and department managers;

- sustain a personalized approach to education, with a teaching-learning perspective and through close relationship between faculty and students in small classes;
- join theory and practice and elicit a commitment to systematic inquiry;
- encourage creativity, scholarship and entrepreneurship rigor and honor the desire to come to in the teaching-learning process for students and faculty;
- strengthen multidimensional perspectives, professional relationships at various realms, workplaces, classes, in the curriculum as a whole and among faculty's and students as teaching-learning experiences;
- encourage a critical point of view, respecting diversity of perspectives, understanding of their own values and others' values;
- foster with the student, in the teaching-learning process a life long desire for coming to know by a systematic way of inquiry, witnessing change in the multidimensional relationships, committing themselves to lead with a explicit vision, daring to risk and respecting the others;
- build interconnection and relationships to various groups, persons in the health care field, locally, regionally, nationally and internationally;
- strengthen the health service to people, persons, families, communities through choosing methodologies coherent with value respecting human being growth potential and life long learning possibilities.

BA Management

To provide a student-centered education that prepares graduates with the theoretical and practical management and skills necessary for successful entry into management training programs or entry-level management positions in private sector, not-for-profit, and government organizations. The program also prepares students for entry into graduate school.

Doctor of Management

The mission of the Doctor of Management program is to develop post-master's competencies and capabilities in organizational development, leadership and applied research for a broad range of professionals.
