

Audio in Media Arts (BA)

This program is offered by the School of Communications/Audio Aesthetics and Technology Department and is only available at the St. Louis home campus.

Program Description

The bachelor of arts degree in audio in media arts is designed for students who are interested in exploring the use of audio in all forms of media. This degree provides students with opportunities that include working with audio for film, television, video, animation, game design and interactive media. While emphasizing audio for forms of visual media, this program also provides opportunities to work with radio, podcasting, live audio and music production.

Students majoring in audio in media arts cannot have a minor or dual degree in sound recording and engineering.

Learning Outcomes

Successful graduates of this program will be able to:

- Chart and update plans for a media-based production project based on a thorough understanding of audio theory, audio technology, sound recording principles and signal flow.
- Utilize skills in capturing, recording, mixing and finalizing audio on a media-based production project.
- Justify aesthetic choices made on, and evaluate the overall creative success of, a media-based production project.
- Work collaboratively and professionally with artists to produce deliverables consistent with industry standards.

Emphasis in International Audio Production

The emphasis in international audio production is designed for students with an interest in international language and culture.

Emphasis-Specific Learning Outcomes

In addition to the general learning outcomes for the major, students who complete the emphasis in international audio production will be able to:

- Communicate, both orally and in writing, with people from another culture using a language not native to the student.
- Engage in production of audio in media arts in a foreign country, communicating in the native language of that country.

Requirements for the Emphasis in International Audio Production

In addition to the 55 credit hours required by the audio in media arts major, the following is required for the emphasis in international audio production:

- Successful completion (with a B or better) of 18 credits in a foreign language. If the student is already proficient in more than one language, a statement by the chair of the Global Languages, Cultures and Societies department confirming that the student meets a reasonable requirement for basic fluency in the chosen language can be used to waive this requirement. (A foreign language is defined as one not native to the student. If English is the second language, then the internship must still take place as defined below).
- Successful completion of an international audio internship is defined as follows:
 - The internship must be completed outside the student's native country;
 - The internship is in the foreign language in which the student has concentrated (or demonstrated proficiency in);
 - The student receives a grade of B or better in the internship (MDST 4950).
