

Basic Finance for Managers BUSN-5200

F2 2021 Section 36 3 Credits 10/18/2021 to 12/17/2021 Modified 10/01/2021

Meeting Times

Lecture

Thursday, 5:00 PM to 9:00 PM

Description

Managers and human resources management professionals must be able to understand financial information contained in financial statements and reports. Line managers must be able to understand financial information contained in financial statements and reports in order to evaluate their unit's financial performance, to communicate clearly with other managers, and to apply financial information when making decisions. Human resources management professionals must understand financial statements and principles if they are to effectively assist line managers and be strategic partners with other business functions. This course will focus on the interpretation and use of basic financial information by non-financial managers, not on the production of financial statements and reports. (FINC 5000 cannot be substituted for BUSN 5200.)

Requisites

None

Outcomes

Outcome	Expectation
Students have a basic familiarity with the field of finance and an understanding of the financial goal of a business, and they have an appreciation for the ethical considerations inherent in financial management.	Students can explain the broad structure of the financial field, how the finance department functions in a typical organization and they can define the financial goal of all business firms, differentiating between wealth and profit maximization. Also, students can give illustrations of the ethical issues that arise in connection with financial management and they can explain how the principles in this course apply to non-profit entities as well as profit seeking firms.
Students can explain basic accounting principles, are able to read and interpret the firm's basic financial statements, and can use financial ratios to assess a firm's health and performance.	Students can explain the fundamental principles upon which accounting is based, can interpret the various accounts on income statements, balance sheets, and cash flow statements, and can evaluate the health and performance of a firm using ratio analysis.
Students can prepare a budget and understand its use in financial decision making.	Students can prepare an operating budget for a typical department in a firm.
Students can explain the time value of money concept and how it is used in decision making.	Students can explain why the time value of money concept is important in business and can solve simple time value of money problems, including solving for a rate of return.
Students can evaluate business proposals using capital budgeting decision rules such as payback, break-even analysis, NPV, and IRR.	Students are able to calculate payback periods, read a break-even chart, and apply the NPV and IRR criteria to evaluate the merits of a project.
