ABOUT THE DEPARTMENT OF ANTHROPOLOGY & SOCIOLOGY:

Programs in the Department of Anthropology & Sociology analyze social and cultural dimensions of human life in the contemporary world, foster critical thinking and analytic skills among students, and seek to help students draw links between their individual lives and broader processes of political, economic, and social/cultural change. By understanding how our lives are intertwined with larger social structures and processes, students will be better able to engage in the world around them.

The *cultural anthropology* program focuses on the study of everyday lives in human cultures across the globe, with attention to human rights, immigration and urban life, and sustainability and indigenous peoples.

The *sociology* program emphasizes globalization and empiricism, providing students the tools to critically analyze patterns of social behavior, with particular attention to race, gender, social class, and diversity.

The *criminology* program provides special focus on transnational crime, especially terrorism and homeland security, and elite offending, especially white collar crime.

The *women and gender studies* program engages Webster's legacy of social justice to provide students with the practical and intellectual tools to analyze gender and sexualities.
